My favourite animal

My favourite animals are pumas (Felis concolor).

They live in the mountainous regions and in dense forests.

They are very big felines (H: 70 cm - L: 1,20cm+60cm), they can weigh 80kg; they are carnivorous and their fur is quite golden.

Pumas have got long tails (60 cm), four fast and powerful legs, two small ears and extraordinary reflexes.

They can run very fast, move silently, they can climb and they can swim and jump very well.

Pumas eat big animals, birds and rodents.
