

Cleopatra

Cleopatra was the queen of the ancient Egypt , but she is known as Cleopatra VII . She was born in 69 B.C. ,but we don't know where she died. , Cleopatra was the daughter of a pharaoh. She learned how to govern by watching her father. She spoke many different languages so that she could communicate with the people of Egypt and those in other lands. , Cleopatra started to govern in 51 B.C. . Cleopatra shared the throne with her brother Ptolemy XIII .

Ptolemy was able to take control of the government and to force Cleopatra flee Egypt in 48 BC . Cleopatra was helped by the Roman P Caesar. Cleopatra was beautiful which made Caesar wanting to help her. When she got the power again, she shared it with another brother-husband, Ptolemy XIV.

Caesar had a child from Cleopatra. When Caesar died, Cleopatra met another leader of Rome Mark Antony.

Shortly after, she was pregnant and gave birth to twins: a son called Alexander Helios and a daughter Cleopatra Selene. Antony returned to Rome and later married Octavia, the sister of another Roman leader.

Antony left her wife, Octavia for return to Cleopatra, they married and had a third child together Ptolemy Philadelphus. When the Romans attacked Egypt she preferred to die. She didn't want to be a prisoner in Rome. A poisonous snake bite Cleopatra and she died, but she remains in our book of history for ever!!!!
